

**FOR IMMEDIATE RELEASE:**

**Abundant Energy, LLC. Hires Plant Manager for Manufacturing Facility**

*Vernon, Texas – March 28, 2011*

Jim Murphy has been hired as Plant Manager of Abundant Energy's Vernon, Texas facility. Bringing 20 years of manufacturing experience to the job, Murphy will oversee the operation of the Vernon facility, as well as many of Abundant Energy's on-site wind generation projects.

"I'm grateful to Abundant Energy for giving me the chance to be a part of an endeavor with such exciting possibilities" said Murphy. "My immediate focus is to help complete the production of our first commercial mid-sized vertical-axis wind turbine being erected in Clovis, New Mexico, while also preparing our Vernon facility for future production."

Abundant Energy has already made numerous renovations to its 26,000 square foot facility in Vernon and will gradually make personnel and equipment additions as operations ramp up.

Austin, Texas-based Abundant Energy, LLC. is a renewable energy company focused on the design, manufacture and deployment of innovative, reliable, clean energy technologies. Abundant Energy's mid-sized, vertical-axis wind turbines are designed to reduce energy costs for municipal and industrial customers by generating power directly on the distribution side of the energy grid.
