

**FOR IMMEDIATE RELEASE:**

Abundant Energy, LLC. Provides Update on Wind Turbine Progress

*Vernon, Texas - December 12, 2011*

Officials of Abundant Energy LLC. will be in the offices of the Business Development Corporation of Vernon at 1pm on Dec. 13<sup>th</sup> to give an update on the progress being made with the development of their first commercial mid-sized vertical-axis wind turbine.

CEO Doug Burns will join COO and Vernon resident Doug Moore to discuss the status of their Windflyer® generator, which is being completed in Clovis, New Mexico. In addition, Burns and Moore will give an overview of recent business developments, including the preparatory work underway at their local Vernon manufacturing facility.

Abundant Energy is in the final stages of achieving full operational status for their first Windflyer®. Once it is in operation, Abundant Energy's engineers will continue testing, assessing and modifying the unit, in preparation for full-scale production.

"We can definitely see the light at the end of the tunnel," said Moore. "We are anxious to test the unit and to take the important step of recording the data that will verify the performance of the Windflyer® in a full range of wind conditions."

Austin, Texas-based Abundant Energy, LLC. is a renewable energy company focused on the design, manufacture and deployment of innovative, reliable, clean energy technologies. Abundant Energy's mid-sized, vertical-axis wind turbines are designed to reduce energy costs for municipal and industrial customers by generating power directly on the distribution side of the energy grid.
